Think You Can’t Afford A New Nurse Call System… Think Again.

VisionLink™ Wireless Nurse Call System
Life Safety Made Easy

Start Small, Think Big!
Vision Link Premier® Wireless Nurse Call System is ETL Listed as a complete system to UL1069 Edition 7 for “Hospital Signaling and Nurse Call Equipment,” or UL 2560 for “Assisted Living and Independent Living Facilities” or the Canadian CSA C22.2 NO. 205-12 for “Signal Equipment.” Vision Link Premier® uses the Windows 10® operating system, 900 MHz spread spectrum wireless technology and an industrial computer with solid state hard drive to link your residents with your staff. The scheduler reminds caregivers to give medications, lock doors or perform other tasks. No expensive licenses or upgrades are required to add more equipment at any time. Our LED corridor and zone lights are connected on a single pair of wires for fast, easy installation. Vision Link also includes eight call analysis reports, remote access, email notification, and automatic backup at no additional cost.

Flexible Software
Patient information, statistical call analysis reports with staff response times, active and passive resident and staff check-in, patient bed turn notification, flexible alarm notification with escalation and so much more are all standard features of the powerful and flexible Vision Link integration platform. Engineered for the future, new developments are always backwards compatible to ensure it accommodates the growth and requirements of your community.

Staff Mobility
Caregivers can receive alarm call notification not just on consoles but also on touch screen clients, Android and IOS devices, pocket pagers, two way radios, telephones, email, cell phones, iPod’s, iPad’s, LED reader boards, remote monitors and more with flexible escalation for unanswered assistance calls. All events are logged including staff response time for password protected management reports. In addition to alarm notification, text messages can be silently sent from any console or computer to any pocket pager, cell phone or employee group eliminating institutional overhead paging. Send staff text messages for calls on hold plus scheduled reminders as needed. Notify staff for resident elopement, door/window exit, smoke detectors, motion detectors, bed/chair exit pads, equipment status, mass emergency notification, whatever your facility requires.

The 900MHz Advantage
Because the FCC allows higher transmit power for 900MHz spread spectrum systems, Vision Link II provides superior in-building range and up to 10 times the range of 300MHz products. It is also fully supervised and notifies staff when a low battery or inactive device is detected. In contrast, it takes some systems up to 24 hours to report an inoperative station and some wired or wireless nurse call systems are not supervised at all.

Ensure Safety for Residents and Staff with a VisionLink™ Wireless Emergency Call System

**Equipment Options**
- ETL Listed to UL1069 Edition 7 or UL 2560
- ETL Certified to Canadian CSA C22.2#205 -12
- Location, elopement and fall alarm transmitters
- Wireless patient and code blue stations
- Wireless staff and resident emergency stations
- LED Corridor and Zone Lamps (white up to four color)
- Custom sconce indicator lamps
- Alpha-numeric pocket pager & LED reader boards
- Central station alarm monitoring interface
- Telephone and cellular phone interface
- Cisco®, Spectralink®, Ascom & Panasonic interface
- Two way radio, email and PDA interface
- Networked consoles can select response areas
- Remote access for reports and programming
- Door/Window/Bed exit notification
- Wandering patient management
- Smoke/motion/glass breakage detection
- Active or passive resident check-in status
- Repeater/Locators for campus coverage
- Computer, server and desktop consoles

**Standard Features**
- Industrial computer & solid state hard drive
- 900 MHz spread spectrum technology
- Fully supervised battery and operation
- Alarm calls reset at the source
- Password protection
- Visual/audible alarm prioritization
- User replaceable long-life battery
- Includes statistical call reports package
- Battery back-up included
- Email notification

**Call Today**
Our experienced, knowledgeable technical staff would be happy to answer your questions or give you ideas on how to put wireless to work for your facility.

**More Features**
- Compatible with other call systems
- Pendant fall alarm & wander notification
- Internal & external batteries monitored
- Programmable call escalation
- Advanced management reports
- Silent text messaging
- Touch screen clients to display area calls
- Quality assurance verification
- Timed egress alarm notification
- Text messaging
- Staff presence indication
- Bed turn scheduler
