The Experts in Wireless Nurse Call

+ CarePredict

A Complete Solution For Wireless Nurse Call and Patient Monitoring

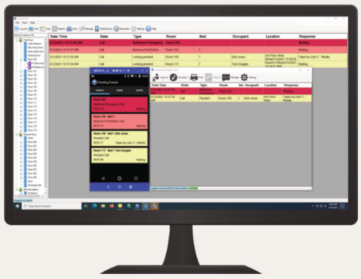
VisionLink™ II
Wireless Nurse Call System

+ CarePredict

Seamless Integration

Actionable Insights

Wireless devices such as wristbands, pull-stations, doorbells, geofencing, and more send alerts to a VisionLink II Master Station.



The VisionLink II Nurse Call Master Station processes the data and pushes alerts to CarePredict's dashboards and mobile app.

The CarePredict App provides caregivers with actionable insights into staff response times, and patient health & activity trends.

Resident-Staff Two-Way Voice

Using CarePredict's two-way staff alert feature, staff and caregivers can communicate directly with residents who activate the button on their Tempo wristband device. This allows caregivers to assess the nature of the summons so they can prioritize their assistance accordingly.

Increased Staff Efficiency

CarePredict's activity monitoring also benefits staff by allowing staffing levels to be optimized according to real time needs, highlighting staff who are going above and beyond, streamlining documentation to prevent staff burnout, and eliminating manual charting.

Fall Detection

The Tempo wristband incorporates an intelligent fall detection system using a machine learning model. When a fall is detected, the care staff are immediately alerted, and when the staff confirms a fall, the Tempo learns over time to distinguish true falls accurately.

Wander Management

Keep your wander prone residents safe using geofencing with CarePredict monitoring. Set safe zones, receive immediate alerts, and follow analytics regarding trends in both resident wandering and staff response.

CarePredict

The Best Team For Your Assisted Living Needs

"CarePredict is a full-circle system. In addition to providing nurse call support, it gives us the analytics we need to make the right decisions with our residents and their well-being. From a staff utilization perspective, it helps us see where our staff is and who they are serving. So, it is a complete technology system that doesn't just do one thing but does many things in one package."

Peter DeMangus, CMO, Solterra Companies

"Systems Technologies provides excellent customer service and I can't recommend them highly enough. Our Vision Link system has worked so well over the years that we now use it in many of our other properties as well."
