- Wireless Door and Window exit sensors
- Smoke/Motion/Glass breakage sensors
- IV Pump and Ventilator alarm notification
- Repeaters for large area coverage

Whether your clinic is large or small, Vision systems provide an inexpensive wireless solution for your nurse call requirements. The console simply plugs into a standard electrical outlet and "hears" the fully supervised wireless signals from all Vision stations and transmitter devices. Stations can be easily flush mounted in existing walls for a clean, finished appearance and are powered by a 3V user replaceable lithium battery with an expected 4 to 5 year life.

When activated, the call station instantly signals

nursing staff that help is needed. Add emergency pull stations in bathrooms to meet state and local code requirements. For additional annunciation, corridor lights can be added above the doors. Multiple consoles, monitors or electronic readerboards can be installed for staff notification or simply use pocket pagers to receive alarm information or even text messages for calls on hold or patients waiting.

MicroVision 200 Console with two digit numeric alarm display and LED indicators. Wall mount kit included

VisionLink Video Display console PC offers reports, scheduler, pocket pager & telephone notification.

MicroVision 300 Desktop Console with programmable alpha-numeric display and optional staff pocket paging.

### Call Today

Our experienced and knowledgeable technical staff would be happy to answer your questions or give you ideas on how to put wireless to work for your facility.
